

Finalizing the present offline client

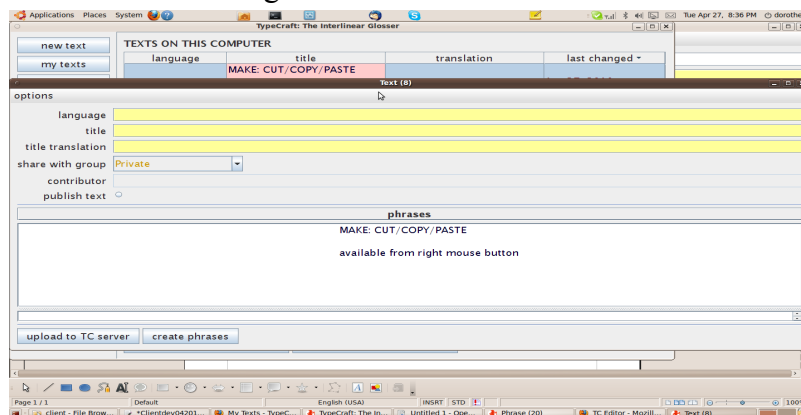

(1) Bugged function - The menu option:

| Expected behavior | Observed behavior |
|---|---|
| Call on 'menu' function while editing the field | Only when not editing the field the menu function can be called on (right mouse-button) |
| Rename is not a menu option | Rename word |
| A morpheme menu is available at the morph line A word menu is available at the word line | The morph menu available at the meaning and Gloss line The word menu available at the POS line |

The '**Phrase fields are incomplete**' message should be replaced by:
Enter a title into the 'translation' field before closing the window.

(2) Missing functions

- * Import the new baseform tier from the online client.
- * Import the renaming of tier + mouse-over text from the 'new' annotation table
- * Add CUT COPY PASTE. from right mouse button as indicated on screen shot below:

- * The '**TypeCraft wants to know**' window should be scrollable.
- * Add drop-down menu for tags at POS line.
- * Space bar activated in order to navigate annotation table.
- * Rename 'phrase search' as 'local phrase search'

Small extras

- * Replace Troll icon by a simple TC (white in orange) icon.
- * Microsoft Windows: by default the application opens after download.
- * Introduce a 'Help' button' for access to a local help-menu.
